## Onkyo tx-nr737 factory reset

Troubleshooting Resetting the unit to the status at the time of shipment may solve the problem. If the measures above do not solve the problem, reset the unit with the following procedure. If you reset the unit status, your preferences will be reset to the defaults. Note them down before starting reset. How to reset 1. While holding down CBL/SAT on the main unit (note that step 2 must be performed with this button pressed down) 2. Press ON/STANDBY on the unit. "Clear" is appeared on the display and the unit will enter standby mode. How to reset the remote controller 1. While holding down 1RCV on the remote controller (note that step 2 must be performed with this button pressed down) 2. Press and hold down 2 HOME until the 3 remote indicator lights (about 3 seconds). Within 30 seconds, press 1RCV again. SN 29401765HTML EN(C) Copyright 2014 Onkyo Corporation Japan. All rights reserved. 55Problems may be solved by simply turning the power on/off or disconnecting/connecting the power cord, which is easier than working on the connection, setting and operating procedure. Try the simple measures on both the unit and the connected device. If the problem is that the video or audio is not output or the HDMI linked operation does not work, disconnecting/connecting the HDMI cable may solve it. When reconnecting, be careful not to wind the HDMI cable since if wound the HDMI cable may not fit well. After reconnecting, turn off and on the unit and the connected device. Resetting the unit to the status at the time of shipment may solve the problem. If the measures above do not solve the problem, reset the unit with the following procedure. If you reset the unit status, your preferences will be reset to the defaults. Note them down before starting reset. ■ 1. While holding down CBL/SAT on the main unit (note that step 2 must be performed with this button pressed down) 2. Press ON/STANDBY on the unit. "Clear" is appeared on the display and the unit will enter standby mode. Clear 2 ■ 1. While holding down 1RCV on the remote controller (note that step 2 must be performed with this button pressed down) 2. Press and hold down 2 HOME until the 3 remote indicator lights (about 3 seconds). Within 30 seconds, press 1RCV again. 123 ■ Can not turn on the unit Make sure that the power cord is properly plugged into the wall outlet. r Unplug the power cord from the wall outlet, wait 5 seconds or more, then plug it in again. ■ The unit turns off unexpectedly The unit will automatically enter standby mode when Auto Standby has been set and launches. ■ The unit turns off and after restoring the power, it turns off again The protection circuit has been activated. Remove the power cord from the wall outlet immediately. Make sure that all speaker cables and input sources are properly connected, and leave the unit with its power cord disconnected for 1 hour. After that, reconnect the power cord and turn the power on. If the unit turns off again, avoid resetting it and unplug the power cord. Then contact your Onkyo dealer. Caution: If "CHECK SP WIRE" is appeared on the display, the speaker cables may be shorting. WARNING: If smoke, smell or abnormal noise is produced by the unit, unplug the power cord from the wall outlet immediately and contact the dealer or Onkyo Support. ■ There is no sound, or it is very quiet Make sure that the proper input source is selected. r Make sure that connecting plugs are pushed in all the way. r Make sure that the inputs and outputs of all components are connected properly. r Make sure that the polarity of the speaker cables is correct, and that no bare wires are in contact with the metal part of speaker terminals. r Make sure that the input source is properly selected. r Make sure that the speaker cables are not shorting. r Check the volume. The volume level is adjustable between Min, 1 to 99, Max (100). It is normal that the unit volume level is set up to 40 or around. r If the MUTING indicator on the display flashes, press MUTING on the remote controller to unmute the unit. r While headphones are connected to the PHONES jack, no sound is output from the speakers. r If there is no sound from a BD/DVD player connected to an HDMI IN, check the BD/DVD player's output settings, and be sure to select a supported audio format. r Check the digital audio output setting on the connected component. On some game consoles, such as those that support DVD, the default setting is off. r With some DVD-Video discs, you need to select an audio output format from a menu. r If your turntable uses an MC cartridge, you must connect an MC head amp, or an MC transformer. r Make sure that none of the connecting cables are bent, twisted, or damaged. r Not all listening modes use all speakers. r Specify the speaker distances and adjust the individual speaker levels. r Make sure that the speaker setup microphone is not still connected. r Set to "Off" if "Audio Selector" - "Fixed Mode" is set to "PCM" or "DTS" ■ Only the front speakers produce sound When the Stereo or Mono listening mode is selected, only the front speakers and subwoofer produce sound. r Make sure the speakers are configured correctly. Before starting the procedure Problems may be solved by simply turning the power on/off or disconnecting/connecting the power cord, which is easier than working on the connection, setting and operating procedure. Try the simple measures on both the unit and the connected device. If the problem is that the video or audio is not output or the HDMI linked operation does not work, disconnecting/connecting the HDMI cable may solve it. When reconnecting, be careful not to wind the HDMI cable since if wound the HDMI cable may not fit well. After reconnecting, turn off and on the unit and the connected device. The AV receiver turns off unexpectedly. • The AV receiver will automatically enter standby mode when Auto Standby is set and launched. There's no sound, or it's very quiet. • A wrong input selector button has been selected. Select a correct input for the player. Also check that muting is not on. • Not all listening modes use all speakers. There's no picture. • A wrong input selector button has been selected. • Video is not displayed if the listening mode is Pure Audio. (European, Australian and Asian models) • To display video from the connected player on the TV screen while the unit is in standby, you need to enable HDMI Through function. • When the TV image is blurry or unclear, power cord or connection cables of the unit may have interfered. In that case, keep distance between TV antenna cable and cables of the unit. HDMI control does not function correctly. • Set the CEC link function of the unit to on. It is also necessary to make the HDMI linked system setting on the TV. See the TV's instruction manual for details. The remote controller does not work. • Be sure to press RCV first before operating the unit with the remote controller. There is no sound for Zone function. • With Zone function, sound is output only when the signal input source is an external component connected to the analog audio input jacks of the unit, "NET", "USB" or "BLUETOOTH". Zone playback is not possible if the player and the unit are connected via HDMI cable or digital cable. Connect the RCA audio output jacks of the player and the analog audio input jacks of the unit with analog audio cable. Also analog audio output setting may be necessary on the player. Cannot access to network. • Try plugging/unplugging the unit or the wireless LAN router or check their power-on status. This will work well in many cases. • If the desired wireless LAN router is not in the access point list, it may be set to hide SSID or the ANY connection may be off. Change the setting and try again. Bluetooth • Try plugging/unplugging the unit and the Bluetooth-enabled player. After that, check that the Bluetooth function is enabled on the Bluetooth-enabled device and the connection with the unit has been established. Resetting the unit Resetting the unit to the status at the time of shipment may solve the problem. If the measures above do not solve the problem, reset the unit with the following procedure. If you reset the unit status, your preferences will be reset to the defaults. Note them down before starting reset. How to reset: 1. While holding down CBL/SAT on the main unit (note that step 2 must be performed with this button pressed down) Press zON/STANDBY on the main unit ("Clear" 2. appears on the display and the unit returns to standby) 2. 1. Press zON/ While holding STANDBY. down CBL/SAT, How to reset the remote controller: 1. While holding down RCV on the remote controller, press HOME until the remote indicator lights (about 3 seconds) 2. Within 30 seconds, press RCV again RCV C l e a r Remote indicator HOME 17
